Technology Management

We manage complex projects successfully

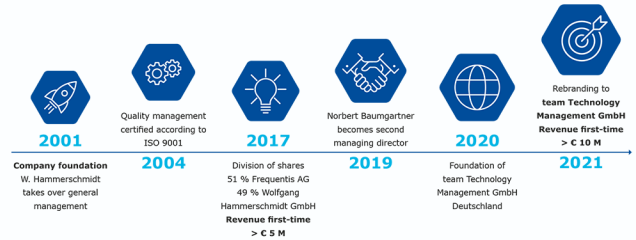
20 YEARS team

As a manufacturer-independent consulting company, team has been making a valuable contribution to more security and safety in the area of critical infrastructure for more than 20 years.

Simply safe. Simplify the complexity of IT infrastructures, enable security and safety. This also poses challenges for public clients, in which **team** is at your side as a reliable partner. The switch from analog to BOS digital radio, the implementation of ETCS as the new safety standard in the European railway sector - they mark the first successes of the 20 years of work by **team** to and led to beeing strategic partner for public clients.

Simply competent. The training and further education as well as accredited certification of our employees are an important part of our company culture. They guarantee our customers the use of the latest knowledge, methods and tools. We expand our skills through the ongoing training of our employees and support students with their dissertations and master's theses. In close cooperation with various universities of applied sciences, we promote the future of competent **team**Players.

teamDevelopment



Customers

team Technology Management GmbH has been a reliable partner of ASFiNAG for years. Their expertise is a guarantee for the future-oriented continuous development of our traffic management information system, the heart of traffic control on Austria's motorways and expressways.

Congratulations on your company anniversary!

Christian Ebner, BA - Managing Director
ASFiNAG Service GmbH

The goal-oriented support from the team employees in the area of safety systems has contributed to the successful start-up of the two base tunnels at Gotthard and Ceneri.

Johannes Scheuner - Team leader
Project Management Development
SBB AG

teamWork

Our **team** has grown steadily over the past 20 years and is constantly expanding. With more than 70 % university graduates, the training level of our **team**Players is very high. That's not all - the continuous training of our consultants is important to us and is something to be proud of!
